Assign your kids a theme in nature (animals, leafy, wet, rocks, blue, small, shiny, rough, etc.) and let them take photos related to that theme. Once they have taken photos, return home and upload them. Have kids pick out their favorite 8-12 photos and make a PowerPoint, Prezi, or word doc with their chosen photos in it. Act as an audience as they describe their theme, what they took photos of, and why they chose to take those photos. You can give awards for most creative use of theme, most interesting shot, most interesting composition, funniest, most surprising, etc., if you wish.
